

# HOW WE SHIP FOOD:

innovative + sustainable

# ABOUT KODIAKCOOLER®

KODIAKCOOLER® is an insulated packaging company that has been serving and leading the industry since 2005. It is our goal to provide reliable, sustainable, and innovative packaging for temperature-sensitive products, and it is our passion to serve our customers faithfully as we build relationships founded on integrity.

KODIAKCOOLER® understands the specialized requirements unique to shippers of delicate, time and temperature sensitive products. With over 75 years of combined experience providing packaging design and service solutions, the KODIAKCOOLER® team is dedicated to delivering the best packaging products and designs, each tailored to the customer's requirements. Working with a diverse inventory of innovative packaging products, our goal is to build measurable value into each packaging model.

Whether you're a national meal kit company or a local start-up bakery, we offer a reliable, innovative and sustainable packaging solution for your perishable shipments.

Our custom packaging solutions give our clients the ability to continually create new recipes and deliver the freshest ingredients to their customers.

**CONSUMERS ARE MORE  
AWARE AND MORE  
SKEPTICAL OF  
ENVIRONMENTAL  
STRATEGIES THAN EVER.**

As a result, sustainable packaging is expected by consumers. They are demanding less packaging and more convenient recycling.

At the same time, the logistics of implementing sustainable packaging for perishable shipments, especially when your company is rapidly growing, can be tricky to coordinate.

That's why we've designed a packaging solution to simplify the process for you and make recycling more accessible for your customers.

**INTRODUCING  
A SUSTAINABLE  
SOLUTION.**

USE WITH GEL OR DRY ICE

ABSORBS CONDENSATION & LEAKS

EXCEPTIONAL CUSHIONING

KWIKPACK® ASSEMBLY SYSTEM

LOWERS SHIPPING COSTS

REQUIRES LESS STORAGE SPACE

NATIONWIDE MANUFACTURING

# ASSEMBLY

 **KWIKPACK®**

This one-piece design **saves time** with a less-than-6-second assembly, **saves money** on freight and storage, and **saves space** by being bundled together in dispenser boxes or pallet bins.

# TESTING

KODIAKCOOLER has in-house thermal testing capabilities as well as access to independent thermal testing labs. We have years of experience developing and mapping protocols for the food and pharma industries. With the right information, we can help you develop the perfect packaging solution!

# RECYCLING

## REUSABLE.

the liners are safe to reuse in many applications.

## RECYCLABLE.

after separating the liners from the poly film, the liners can be recycled at drop off locations across the nation.

## BIODEGRADABLE.

the Natural Fiber Pads are biodegradable and compostable as tested by an independent third-party laboratory using ASTM test standards.

For more information go to  
**[KODIAKOTTON.com/recycle](https://KODIAKOTTON.com/recycle)**

# HOW TO RECYCLE KODIAKOTTON®

## CARDBOARD BOX.

Simply flatten the box and recycle with the rest of your cardboard and paper.

## NATURAL FIBER LINERS.

Our natural fiber pads are fully recyclable. Remove them from the poly film and recycle where **#60 cotton** is accepted.

Some widely-known companies that accept textiles in this form are **H&M**, **The North Face**, and **Columbia**. Drop off the liners at participating stores.

For those who don't have convenient access to these drop-off locations, you can send the liners back to us, or even throw them away as they will fully biodegrade.

## POLY FILM.

After separating the poly film from the natural fiber pads, the poly film can be recycled with the rest of your **#4 plastic bags**.

## GEL PACKS.

Let the gel packs melt completely, snip the corner off a pack, empty into trash and recycle the outer covering with other **#4 plastics**.

## FOAM

Our custom cuts make the perfect fit for shipping any size cake.

## GEL PACKS

Our standard gel ice packs are the most cost-effective solutions for maintaining a refrigerated environment.

## REFLECTIVE

Shipping cupcakes? Our tried-and-true solutions using reflective technology have been perfected over the years, so your customers can receive their order in flawless condition.

Serving the specialty food industry requires a wide variety of custom solutions. Call a sales associate today to talk about what insulated shipping might look like for you.

## NEXT STEPS

Ordering from us is simple. Call or contact us using the information below. Our packaging experts will work with you to learn about your shipping requirements and create a custom solution based on your needs. From sampling to testing to finally delivery, KODIAKCOOLER® is ready to serve.
